

# Technical Assistance to the Angolan Ministry of Energy and Water

NVE  
International  
Section

*Technical assistance aiming at capacity building.*

## Background:

Norway has a long record of cooperation in the energy sector in Angola, which started already in 1987, with several programmes having been implemented to date. In a letter to the Royal Norwegian Embassy in Luanda (RNEL) dated 28 February 2011, MINEA again requested assistance in the fields of electricity and water.

After a programme development phase, the programme document was approved in the fall of 2012. The Technical Assistance Programme started in January 2013.

## Type of Activities:

The programme covers three areas of cooperation:

- Renewable energy, covering development of a strategy and action plan and a relevant legal framework.
- Energy Efficiency. Initially a survey of electricity use in Luanda has been carried out. Further activities will be planned based on the findings.
- Hydrology, focussing on supporting the building up of a newly established national institute for water resources.
